

Seamless School Security: Integrated Alarm System & Access Control

ProTELEC's Unified System Allows Real-time Control Via an Intuitive App or Web Portal.

Adjust Access Rights:

- Easily add or remove users (students, staff, visitors).
- Adjust access rights to specific areas within the school.
- Arm or disarm the school's security system remotely.
- Lock or unlock doors from a central location.

Push Notifications for:

- Intrusions, unauthorized entry attempts or alarm activations.
- Duress signals from panic buttons.
- Environmental conditions like temperature fluctuations in sensitive areas (e.g., server rooms, science labs) or moisture detection in areas prone to leaks.

Automated Reports:

- Generate custom arrival and departure logs for staff and authorized visitors.
- Schedule reports on a daily, weekly, or monthly basis to gain a clear overview of building activity and access patterns.

Save Administrative Time:

- Reduce time dealing with user access permissions.
- Reduce the potential for human error associated with managing separate systems.
- Reduce time training staff.

Traditional lock-and-key systems pose security risks. ProTELEC's Integrated Alarm and Access Control System offers a smarter, more efficient solution.

By combining access control and your schools traditional security system, we eliminate the complexities of managing separate platforms.

Gain centralized control over who enters your buildings and when, receive real-time alerts for security events, and free up valuable administrative time.
